

# Salesforce Developer

## Partners Wealth Group Melbourne

---

At Partners Wealth Group, we enable our clients to navigate life's difficult financial decisions. We're a multi-disciplined professional services firm, providing wealth solutions, superannuation, legal, insurance and lending solutions across Australia.

We have a passion for providing the best possible solution and experience for our clients, partners and our team. Our CRM requirements are evolving to support our rapid growth, and that's where you come in.

### About the role

As Salesforce Developer at Partners Wealth Group, you'll be based in Melbourne and responsible for designing and developing customised solutions within the Salesforce platform. This will involve meeting with business stakeholders, analysing project objectives, coding new Salesforce applications, creating customer workflows, maintaining user roles, and troubleshooting application errors.

You'll also play a key part in helping us plan future products and features as we build out our roadmap, including where we see technology playing a key role in how deliver value.

To ensure success, you'll need to have experience working with Salesforce. You'll also need application development skills and the ability to solve complex software problems.

Your work will have a huge influence on the way we run our business, so if you like to see the direct impact of your developments, you'll fit right in!

### Main responsibilities of the role

- Meeting with managers to determine CRM needs.
- Developing customised solutions within the Salesforce platform.
- Designing, coding, and implementing Salesforce applications.
- Creating timelines and development goals.
- Testing the stability and functionality of the application.
- Troubleshooting and fixing bugs.
- Writing instructional documents and providing technical training for internal and external staff.
- Maintaining the security and integrity of the application software.

## Salesforce Developer Requirements

- 2+ years of experience working in a Salesforce development role.
- Proficient in MYSQL, Apex and Classic / Lightning.
- Experience integrating Salesforce with 3rd party systems using web services and AppExchange apps.
- Ability to problem solve high-level software and application issues.
- Strong understanding of fundamental data structures and modelling.
- Ability to deliver accurate application of business requirements.
